Measuring range settings

Only actuate the teach inputs when the shaft is at a standstill.

Bridge between Ub (pin 1) and	Teach input teach 1 (pin 4)	Teach input teach 2 (pin 5)	LED
>1 second	Set start point of measuring range		The green LED flashes once
>1 second		Set end point of measuring range. The measuring range must be >21 mm. A start point must have been set beforehand.	The green LED flashes three times
>1 second	Reset to factory setting. Connect teach 1 and teach 2 to UB simultaneously.		The LED flashes green, red, green

If the teach inputs are not used, they should be set to 0 V (GND ground) to avoid faults.
