

BL67 electronic module

Power feeding module with diagnostics function

BL67-PF-24VDC

- Kullanılan fieldbus ve bağlantı teknolojisinden bağımsız
- Koruma sınıfı IP67
- LEDs indicating system status, field supply and diagnostic information
- Can be used to form potential groups
- Supplies field with 24 VDC nominal voltage

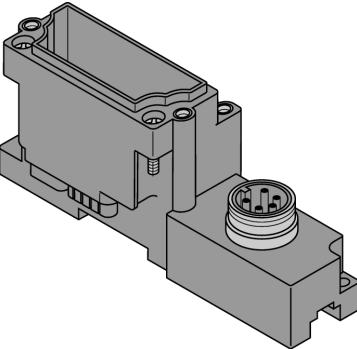

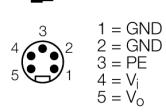

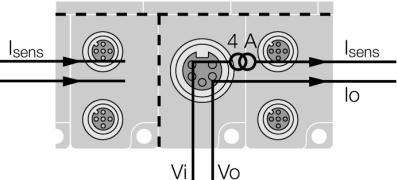

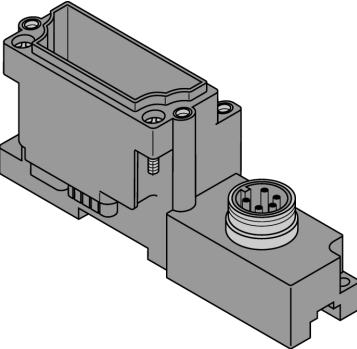

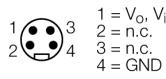

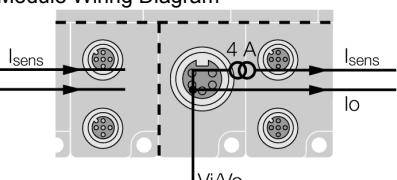

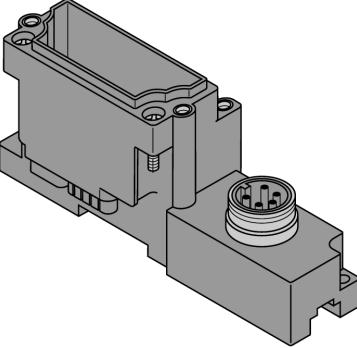

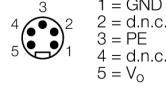

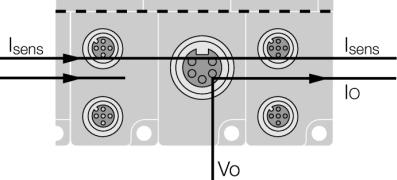

İşlevsel prensip

BL67 electronic modules are plugged on the purely passive base modules which in turn are connected to the field devices. The separation of connection level and electronics simplifies maintenance considerably. Flexibility is enhanced because the user can choose between base modules with different connection technologies.

The electronic modules are completely independent of the higher level fieldbus through the use of gateways.
